

Review and clarification points

1.1 User Registration: (Testable)

Review Points:

- What are the constraints of password?
- If the user leaves the site and then returns, will their data remain saved or will it be deleted?

1.2 User Login: (Testable) / No review points.

1.3 Password Reset: (Testable)

Review Points:

- How can I reset? Is there a button to reset the password?
- What is the expiration period required to send the password change?

1.4 Course Browsing: (Testable) / No review points.

1.5 Add Courses to Cart: (Testable)

Review Points:

- Does the cart persist until the user logs in again, or only for a limited time?
- If the user tries to add the same course again, should the system show a warning or simply ignore it?
- If a course price changes after being added to the cart, should the cart show the updated price or keep the original price?
- If a course is removed from the platform, does the system show a notification to the user or silently remove it?

1.6 Course Enrollment: (Testable) / No review points.

1.7 Payment Processing: (Testable) / No review points.

1.8 Course Content Access: (Testable)

Review Points:

- Are materials downloadable?
- Should users see an error message or a retry option?
- Does watching a partial video count toward progress or must watch all content to counter that as progress?
- Can users manually mark content as complete or apply that automatically?
- Is a certificate given for every course or only paid courses and is itself free or not and if I can download it?
- Does the system save progress?

1.9 Course Reviews & Ratings: (Testable)

Review Points:

- Can a user submit multiple reviews for the same course?
- Is there a validation message for an empty review?
- Can only logged-in users leave reviews?

1.10 Notifications – Course Updates & Reminders: (Testable) / No review points.

1.11 App Download Button: (Testable) / No review points.

1.12 Cross-Browser and Device Compatibility: (Testable)

Review Points:

- Is it available on Apple system devices? / Are there any OS version restrictions?

These requirements can't be tested and we replaced it by other 3 requirements:

1.10 Admin Course Management

1.11 Analytics Dashboard

1.12 Admin User Management
